We get it: you're good.

You can spend all morning canvassing fixed assets with a clipboard, spend all afternoon entering data into a spreadsheet, and still find the strength to hit a game-winning double at your late-night company softball game.

But just because you can do all that, doesn't mean you have to. What if Sage could help you save thousands of dollars, thousands of man-hours, and thousands of costly, unnecessary errors?

Well, you'd have extra time for batting practice, and a whole lot more.

Presenting the Sage Fixed Asset Management Kit

A faster, easier, more accurate way to track and manage your fixed assets.

We know firsthand how difficult it can be to monitor fixed assets on the move at multiple locations. We also know how easy it can be to miss things, not to mention how costly.

That's why our Fixed Asset Management Kit simplifies and fortifies the process of tracking inventory and managing the lifecycle of all of your company's fixed assets. And we're giving you a barcode reader—FREE—with your purchase of the Kit.

Pretty soon, you could be:

- Saving thousands each year in tax and insurance overpayments.
- Completing physical inventories in record time.
- Preventing costly depreciation errors that can result in financial reporting mistakes.
- Achieving superior accuracy in both baseline and dynamic inventories.

Your inventory renaissance in three easy pieces

1. **Barcode Reader.** The sleek, PDA-style Unitech PA500. Extremely powerful, yet lightweight and durable. Built to withstand a 4-foot drop to a concrete floor. **Oh, and it's free.**

2. **FAS Asset Accounting.** Manage the lifecycle of your company's fixed assets—from acquisition to disposal—quickly, easily, and effectively. Containing over 300,000 IRS and GAAP depreciation rules, you'll help your company stay in compliance and avoid an unwanted audit! Sage FAS can be customized to work with your accounting system and general ledger and is already compatible with other Sage software products.

3. **FAS Asset Inventory.** To synchronize your barcode reader with your software.

- More than 40 fully customizable fields for asset notations and images—including class, acquisition date, GL asset account, and location.
- Custom security settings for individual users.
- Easy-to-use Check-In/Check-Out feature with activity history for monitoring mobile assets.
- Powerful reporting on checked out, overdue, transferred, and duplicate assets.

That's it. Everything you'll need to drastically improve your inventory process. And maybe it can't save the world. But it can sure save you time, money, and peace of mind.

Don't forget your labels!

Sage FAS Fixed Assets has a variety of compatible label options available. Tag individual assets with the material that best suits your environment. Choose from a variety of materials and customization options. Call **866-587-9950** for the full label catalog!
